Hunters Point Naval Shipyard Superfund Site (HPNS)
Update on EPA's Discussions with Navy | Radiological Remediation Goals for Buildings
EPA-DTSC-CDPH Meeting, March 24, 2021

Teams Link: here (or see Outlook meeting invitation)
Conference call:

Summary/review of how this discussion began

- Five-Year Review and determining whether the remedies are still protective
- Radiological retesting and public perception of risk

Navy's evaluation of the radiation remediation goals (RGs) for buildings

- EPA's position is the Navy should demonstrate the building RGs are protective for future residential occupancy using a risk-based approach
- Considerations on the technically achievability of minimum detectable concentrations (MDCs) lower than the 20 dpm/100cm2 for the removable fraction (dust)

Forthcoming meeting with the Navy

Monday, March 29 at 1 pm

Who from DTSC and CDPH should we advise the Navy coordinate with to schedule these meetings?

Possible meeting participants

U.S. Environmental Protection Agency (EPA)

Enrique Manzanilla	Superfund & Emergency Management Division (SEMD) Director
Angeles Herrera	SEMD Assistant Division Director
John Chesnutt	SEMD Federal Facilities Section Manager
Wayne Praskins	SEMD HPNS Remedial Project Manager
Yolanda Sanchez	HPNS Communications Lead

California Department of Toxic Substances Control (DTSC)

Grant Cope	Site Mitigation & Restoration Program (SMRP) Deputy Director
Nelline Knowbel	SMRP Division Chief
Julie Pettijohn	SMRP Branch Chief, Berkeley
Nina Bacey	SMRP Project Manager

California Department of Public Health (CDPH)

Anthony Chu	Division of Radiation Safety & Env Management Chief
Christopher Pace	Environmental Management Branch (EMB) Manager
Sheetal Singh	EMB Environmental Program Manager
Terry Han	EMB Senior Health Physicist
	Radiological Health Branch (RHB)
