Subject: Request for help from IRIS SSC's
Attachments: ASTDR vs IRIS.XLSX

Hi all,

In Nov/Dec I asked Ashley and Salina to pull together a comparison of what's on IRIS and what's on ATSDR (attached). Would it be possible for the IRIS SSC's to do a quick QA on this? I figure two changes might be EtO and BaP (at least on the IRIS side), but I'd like a second set of eyes on the document before doing an analysis of where there are places where ATSDR has a newer value that's higher than an existing IRIS value, and comparisons with dates.

Any chance IRIS SSC's would be able to help with this?

-Lou
