Yes, the way Kathleen wanted.

Ravi, what version of the document should I use? I know Kathleen wanted us to make changes in our own copy and send to her to add to her main version—is that what I should do? Thanks!

Hi Catherine:

Good to know you will be done in a few days. Nonetheless, please go ahead and insert comment boxes where you will include text. This way I can start my review and if you are not done by then I can send to Vince and others who have agreed to review in this manner given the unforgiving schedule we are with BaP. Sorry to be rushing people but we were not given a choice and have to work with the situation. I know how busy things are getting for you and appreciate your efforts.

Hi Ravi, sorry, working from home today. I think since most of my work will go into the supplemental information draft, I could simply insert comment boxes where I plan to add draft text. Sorry I should have been working on that part first instead of the suppl info, perhaps? It seemed easier and more logical to tackle the suppl info first. I am HOPING I'm only

a few days away from finishing, but I hate to make this promise since I haven't been good about keeping to my timelines. However, a deadline like that might help me pull up to the finish line. I'm going to do my best to have this done in a couple of days—completely done. Thanks!

Hi Catherine:

I came by earlier to discuss this with you. Given the delays, we are thinking it would be best to provide Vince and others with various sections of BaP piecemeal as long as these were modular and stood on their own for review. Non-cancer lags most behind, and cancer is the better option. We could send just the cancer dose-response first. Or if you think we can show a placeholder for the stuff that remains in your part, and it would not affect the review, then we can include the cancer hazard sections also. However if you are just a couple of days from being done, we might as well wait. Please let me know what might be best.
