Subject: RE: ELG Question

Working on it – Jess is looking into whether the Steam & Electric ELG will allow the compliance date to be changed, most likely it can.

Subject: ELG Question

Cath, Paul referred to me an issue related to the possibility of requesting a regulatory extension related to some power plants in WV (Mountaineer, Amos and Mitchell). As these facilities were on the list for CCR, Paul sent the matter to me. I responded back to Paul that HQ is behind in process applications and requests for extension for handling CCR. However, when I followed up with Scott, it turns out that the issue is a request for an extension beyond the October 13th deadline for efforts to meet the new requirements of the ELG Rule. The issue revolves around a pending decision from the PUC to approve (or not) a rate increase to upgrade their wastewater treatment. The facilities are asking if they don't hear from the PUC before the ELG deadline they will need to decide if they have to shut down by 2028 (which I guess is in the Rule). They are asking if there is any flexibility in allowing them to make that decision (if they do not hear back from the PUC timely) beyond the October 13 deadline. Do you have someone assigned to this issue?
