Subject: [EXTERNAL] Opposed to Byhalia Connection Pipeline

My name is Ex. 6 Personal Privacy (PP) and I'm am writing in reference to the proposed Byhalia Oil Pipeline Project which is scheduled to have a section built through Boxtown, Tn. I am strongly against this project as it poses a significant threat to the quality of drinking water to residents. Plains All American has not thought enough of the people in this community to conduct a study to ground water or the drinking water supply and that is why the permit for this project should not be approved. The only study that was conducted by this company was to the surface water and wetlands and that should not be sufficient for approval. Not studying the effects to the drinking water increases the likelihood of gastrointestinal problems, diarrhea, dehydration, cancer, and sadly death. **"WE REQUEST A STUDY TO BE DONE"**

The approval of this project without requiring additional studies would be a direct violation of basic human rights. The health and well-being of citizens in this community should not be an afterthought. We are not second-class citizens and should not be treated as such. Building this pipeline through this predominantly black neighborhood is blatant environmental racism and there should be no place for this in America.

Feel free to email me with a response

Sincerely,
Concerned Citizen
