Thanks Beth-
I'm copying Anne as an FYI so she can send the responses back to her HQ counterparts.

There is no meeting.... We briefed Dennis on this issue on August 27th. We already consulted with the Tribes on the FMC remedy. The attached letter was sent in response to this "LUPC" request. The Tribes repeated their request for consultation in a letter to Mathy on Sept 12th. Dennis responded on Friday on behalf of Mathy again saying we already consulted. That response is also attached.

Jim, Beth -

Have either of you determined whether this is a Dennis level meeting or if Rick/Lori can handle this on Dennis' behalf?

Matt

Jim based on the attached letter, I have been asked to set up a Government to Government meeting with the Regional Administrator to discuss this subject matter. Prior to any movement of slag at the FMC Operable Unit, our Policy makers are needing some answers to many questions. Please let me know when EPA would be able to meet so I can get onto the Fort Hall Business Council's and Land Use Policy Commissioner's schedule.
Thanks for your cooperation and assistance in helping set up this essential meeting.
Kelly
