Subject: Canadian Radium & Uranium Corp. Site EPA Site Contact No. EP-S2-14-01

Mr. Gaughan, I just left you a voice mail explaining that I am the new environmental counsel for Mark Stagg, one of the owners, and was hoping you can help me locate the following information and discuss the status of a Remedial Action that would be acceptable to EPA for the site:

1. Geological Information about the Site – depth to groundwater and thickness of the aquifer (Report called Final Phase III Removal Assessment Trip Report May 15, 2017 indicates two different groundwater depths 5 ft bgs and 23 ft bgs)
2. Off-Site groundwater investigation results
3. Status of Remedial Action Work Plan

Please advise if we can set up a time to talk. Thank you, Linda Shaw
