David:

Our follow-up call this morning, will we use the same call-in numbers, or should I just call you direct?

Thanks,

Rob

Subject: Aquifer Exemption Workshops

David and Scott:

Please find attached a draft PowerPoint presentation for the Aquifer Exemption workshops. I am still working on the slides, as they are too wordy. My plan is to cut this down, but place a more detailed document on our website after the first workshop. There is a lot of information to get out to folks, and using PowerPoint alone will not cut it. I'm sending this your way so that you have an idea of where I was headed. My thought is that we would conduct the workshop by providing the audience with information regarding the different agencies in the order the data/application will be processed. Even though there is information each or your organizations will be addressing, I will cover what the Division will be looking at. I am planning on holding off questions regarding the specific details until the different agencies have an opportunity to explain in more detail their requirements. All this is flexible and I hope this can be a starting point to our discussions tomorrow.

Thanks,

Rob
