John,

Check out these 2 files. Let me know if you see any inconsistencies.

Thanks.

Sorry--I put down the wrong example—it should have been CSS.1.1.4. I used your file from 11:17 AM email today. Look at rows 5-13. I went back to your original file to make sure it wasn't some kind or sorting issue. I am not sure what the multiple entries for CSS.1.1.4 mean?

John,

For CSS.1.4.1, I only see 1 line. That entry is consistent with RAPID. I don't see multiple listings.

Hi Doug—I tried to crosswalk your file with the one I had for identifying products where CCTE is contributing to make sure I did not miss any when I went through the process manually. I sorted your file by product number and found that the product had the same name listed multiple times, but had different center affiliations (see attached CSS.1.4.1 for example). Any ideas—am I doing something incorrectly or not interpreting the data correctly? Thanks.

John

I have added SHC (2, 3, 5, and 9) and SSWR (1, 3, and 5) RAs to the list and parsed out the organizational info. Here's an updated contributor list. This has all been automated. Let me know if you find any errors.

Thanks.
