Importance: High

Hi Cathy,

No problem at all. Please use the attached Draft Final version so that I work from the updated and correct letter.

Thanks,

Carl

I didn't forget about this. I want to revise the sentence about public participation, and maybe add something about treatment. Give me another day or two, please.

Thanks for the reminder. I have a couple of comments/questions. This is well done and ya did a good job especially based on what they gave us.
Thanks,
Glenn

Glenn,
Do you have any comments on the EMDF-EMWMF D3 FFS? Carl is trying to accommodate a 30 day review time (per DOE request).

We haven't asked for any EJ or Climate Change evaluations in the FFS. I think those things can be in the ROD and RD. But we should discuss.

Cathy

Importance: High

Good morning Cathy,

I hope that today is an enjoyable day for you and that you and Glenn have a nice ride up to Oak Ridge later today. Looks like the weather is working in your favor – at least in the greater Atlanta area.

Please discuss and resolve (if possible) our EMWMF-EMDF FFS comments letter. DOE has requested a 30-day response and that date corresponds to **July 22** (next week) – if we want to try and respond in the alloted 30 days. I have read Connie's and your comments and I agree with your added text. Connie caught a typo (great catch!) and raised questions that are just not a part of our response to the FFS – at least not right now. So, with no additional comments from Glenn it is ready to issue and will NOT be a surprise since I have already informed the DRAT that EPA wants the FFS to include ALL of the DRAT work.

I'm only finding minor issues with the EMDF ROD (so far) and that is good news – no fights or hang ups.

That's all for now.

Carl
