It's probably good for all of us to be aware of these discussions on the pyrethroid mitigation. I spoke briefly with Moana, and our folks haven't decide on any revisions to their mitigation so far. I'm also sending Moana our buffer language which may help the pyrethroids get around some of their registrants' concerns with buffers in turf use.

Ricardo

Subject: Pyrethroids - Eco Risk Mitigation - PWG comments attached

Good morning PRD Eco Pyrethroids CRMs,

A couple of updates:

1. We have received comments from the PWG on our draft proposed mitigation (attached)
2. The draft mitigation was also sent to other stakeholders including the National Pest Management Association (NPMA), USDA, Association of Structural Pest Control Regulatory Official (ASPCRO) and State FIFRA Research & Evaluation Group (SFIREG)
3. The Assistant Administer briefing on the Pyrethroids (human health and eco) is scheduled for next Monday (6/24/19)

We will resume meetings in the next couple of weeks to discuss this latest round of comments on the eco proposed mitigation.

Thank you!

Moana
