Re: Waste Resource Energy, Inc.
Delaware County Resource
Recovery Incinerator
City of Chester, Delaware County

Dear Interested Citizen:

The Department has completed its review of the air and waste permit applications for approval to process residual waste at the facility. We have conducted a thorough review of the applications and supporting documentation. Likewise, we have carefully evaluated all comments raised by the public during the course of our review and the testimony provided at the public hearing as well as the written comments received during the comment period after the hearing.

Although there is public opposition to this proposal, we have concluded that the proposal meets all of DER's permitting requirements and the permits must therefore be granted. The air and waste permits are being released today.

Attached is the public comment response document which addresses the concerns raised, the Department response to those concerns, and information on the right of appeal.

Sincerely,

John J. Kennedy, P.E.
Assistant Director
Southeast Regional Office
