Subject: Re: Status Update - New-Indy Catawba LLC's Response to EPA Section 114 Information Request

Thanks Andrew! Only put CBI in the CBI folder and everything else in the non CBI folder please. I think it'll be helpful to set up a subfolder in the New Indy folder that only has the 114 response. TAR

Hi All,

Can someone set up a subfolder folder in the New Indy folder on AEB share point and download the response to it? I don't know if there's a time period that the information at the link will be available for, but I don't want to lose access to it.

Has anything in the response been claimed as CBI? If so, then the CBI information will need to go in a New Indy folder in the CBI portion of AEB share point.

Subject: FW: Status Update - New-Indy Catawba LLC's Response to EPA Section 114 Information Request

Good morning everyone,

New Indy has provided a link it its 114 Response below. It will respond to our follow up questions later this week. Please let me know if you have any questions.

Thanks!
Marirose

Marirose:

Thank you for your e-mail and follow-up questions. We will review your questions and respond next week. Below is a link to documents responsive to the CAA Section 114 information request. Please note that the folders in the link are organized by the headings in the information request. We have populated six of the folders and will continue to populate the other folders as we gather additional information. You should be able to download all the documents from the link. Please let us know if you have questions.

Steve

Subject: RE: Status Update - New-Indy Catawba LLC's Response to EPA Section 114 Information Request

Caution: External email

Hi Steve

Thank you for the status update on New Indy's response to EPA's most recent CAA Section 114 request.

My program clients have a few follow up questions regarding the update.

1. You state that the date, time, and duration of when the stripper off gases are vented to the atmosphere and not sent to the corresponding air pollution control device is not data that is measured. Can you please explain how New Indy complies with the requirements for the steam stripper bypass in 40 CFR §§ 63.443, 63.450(d), and CFR 63.454 if New Indy does not collect or maintain records of this data?
2. Please elaborate on why monthly records of SO2 emissions are not available. (It is the EPA's understanding that the company maintains records of SO2 captured by wood ash (daily records) and annual SO2 emissions (monthly records and 12-month rolling sum records). Combination boiler #1 and combination boiler #2 are emission units that are part of the monthly SO2 emission calculations).
3. Please explain how monthly SO2 emissions from combination boiler #1 and combination boiler #2 are calculated without knowing the amount of SOGs and NCGs incinerated in the boilers.
4. Please elaborate on why monthly bleach and unbleached production data is not available prior to January 2007.
5. Please elaborate on why annual pulping system closed collection system method 21 evaluations, monthly condensate closed collection system inspections, and annual condensate closed collection system method 21 evaluations are not available prior to 2014.

Your status update did not indicate that New Indy would need additional time to respond to the 114 request. Can you please confirm that New Indy is planning to submit a complete response to the 114 request by the original deadline or do you anticipate requesting an extension?

Regards,
Marirose

Subject: Status Update - New-Indy Catawba LLC's Response to EPA Section 114 Information Request

Marirose and Valerie:

Please find attached a status update regarding New-Indy Catawba LLC's response to EPA's Section 114 information request. New-Indy Catawba plans to begin a rolling production next week with the goal of completing production by February 28. Please let us know if you have questions. Thanks.

Steve
