- I believe you were waiting for an invoice so I could present to Weston?

Was there anything else?

Thanks

The Hazardous declaration should match what it says on the outside of the shipping container, and the shipping case should already be labeled correctly.

They can call me if they have any trouble with the paperwork, but they will need to ship that one under their account since they would be the HAZMAT shipper according to DOT.

OK. I wasn't thinking…I am probably going to drop off the two Viper Ludlum 2241 tonight for overnight shipping via Weston.
I will check around for hazardous shipping certification……compressed gas classification, correct?

Thanks

Thanks Dave. I do not see the account number below.

The HPIC were calibrated June 24, 2015. Can I assume they are due every year?
Any suggestions with the HAZ shipping?

Regards,

Eric
