potential disposal of radioluminescent devices at IR-07 and IR-18. Additionally, immediately north of the Galvez/Donahue intersection are HPNS drydocks 7, 6 and 5 where removal of radioluminescent devices from ships is documented on Table 6-1. Sites Impacted by G-RAM Use by the Shipyard.

Finally, as a former elected member of the HPS RAB and founding chair of the radiological subcommittee 2000-2005, I take exception with your submission of this report to SF Shipyard HOA, rather than directing it most appropriately to the county health department.

As a former physician specialist with the San Francisco Department of Public Health and Attending Physician for the Palo Alto Veterans Administration Environmental Registry, I wish to document my concerns that CDPH is acting to promote and advance unsafe residential development on a designated Federal Superfund site.
