Thanks Charles you rock!!

Not sure who OSC Wolfe is? Is that someone on the R5 side? The EPA R3 OSC is Debbie Lindsey.

A slight tweak to how you describe what EPA is doing – the EBAMS are en route but at moment EPA is using datarams. Maybe just be more general and possibly add what we did today? – "EPA deployed four particulate air monitors around the perimeter of the fire, and began collecting data late 10/21/17 (Saturday night). EPA R3 OSC Lindsey is on-site conferring with the WVDEP and the County about additional air monitoring. At OSC Lindsey's request, EPA's Environmental Response Team (ERT) is delivering additional air monitoring equipment to the site on 10/24/17. The County has also hired an environmental contractor CETH to conduct air monitoring. OSC Lindsey and the WVDEP are discussing with the County's contractor a plan to combine the available resources into one air monitoring system. ATSDR R3, ATSDR R5, and DTHHS ERS are coordinating with EPA, WV state and local health, and OH state and local health. Air quality is impacted in both WV and across the river in OH. On 10/34/17, ATSDR shared the guidance from EPA, USFS, CDC, and CARB with EPA and state/local health officials on "Wildfire Smoke: A guide for public health officials" that is applicable in this situation and includes health effects and cautionary statements."

I don't know anything about ORSANCO's involvement, but maybe that was in the news or info from R5.

Subject: EHPM - Activity has been Created

The ACTIVITY Ames Tools (IEI) Fire Parkersburg, WV has been created by Charles Edge (IBD7) and you have been assigned as the POC or Alt POC. Please click on the link above to view the record in EHPM.

Below is additional information about the record.

Type: Emergency Response Assistance
Description: On Saturday morning at 1230 AM, Parkersburg fire crews responded to a fire at the Intercontinental Export and Import Company - Plant #1 on Camden Avenue in Parkersburg WV. The facility is a warehouse housing many plastics related materials. The fire is still ongoing. OSC Wolfe is in contact with on-scene WVDEP representatives, Ohio EMA, and has notified ORSANCO and will continue to report with updates. WVDEP along CTEH are monitoring and sampling the air. Shelter in place has been activated in the affected area. WVDEP asked EPA for air monitoring assistance over the weekend. WVDEP is doing VOCs monitoring. EPA deployed 5 EBAMs and START contractors to support PM monitoring in the field.
Priority: N/A
