Subject: FW: technical assistance request -- "One Chemicals Program"

Nancy/Richard, please see below. Aside from IRIS, are there other programs in ORD (or other offices within EPA) that would make sense to consolidate under OCSPP from a one chemicals standpoint?

If it's easier to set up a call to discuss, please let me know.

Troy. Holly.

Jason is asking for technical assistance to develop a one chemicals program as part of the FY 18 House Markup.

I believe we need to reach out to OCSPP and ORD at the policy level and of course Ryan and Mike Flynn.

Thanks

Ed

> Hey Ed – I'm going to try to ask a complex question very simply. And, given our compressed schedule here, I'm hopeful that you may be able to take it to the right people, and run with it. Of course, feel free to give me a call if you have questions.
>
> What resources would need to be moved (and to where) in order to support a "One Chemicals Program" concept at EPA with TSCA serving as the overarching umbrella? We have all of these various pieces within EPA with different offices offering different expertise. I understand that. However as I look at the budget it seems to make sense if that was all consolidated in one area. If someone were to ask me "please support EPA's chemicals program" then it would be much easier to point to one area – I'm almost thinking about it along the lines of pg9 of the powerpoint briefing in the Hill highlights book. That includes TSCA, Pesticides and IRIS. Obviously we have the OCSSP which oversees both TSCA and pesticides. So perhaps I'm answering my own question – would moving the IRIS program and

resources to OSCCP help align with a “One Chemicals Program” concept?

If the committee were to consider moving such a direction, could you check with folks to see what changes would need to be included in the FY18 bill ? What signals in report language would be necessary? Are there other programs and resources I need to consider that I haven’t mentioned here?

Thanks

Jason
