OB SAC Capability Document.OCSPP.docx

Richard, I apologize for multiple emails…but will your edits incorporate Nancy's comments as well?

Thanks,

Holly

Holly,

See attached. I've also provided some comments on Risk Assessment Methods, page 43 as OCSPP does conduct risk assessments. Computational Tox also applies to OPPT so see comments there as well.

There are a few comments on the other pieces as well. Please let me know if you have questions.

Nancy

Subject: Senate - budget impact statements for your review

Hi Nancy,

I know this is at the heels of the QFRs, but we have another congressional request that needs your review for factual accuracy and consistency with Administration direction.

The due date is **next Monday, August 21st**.

Specifically, the senate budget appropriations committee sent over suggested language to be included as report language in a 2018 appropriations bill (or potentially bill language) on a variety of subjects. They would like our comments/feedback to understand the impact of including such language.

The EPA career staff has analyzed the language and by provided a response within sections under each issue titled "Description of What the Language Does" and "Potential Implications" . I am asking for your technical review of the response, again to ensure factual accuracy and concurrence with this Administration's direction.

The topics within the attached document that you are responsible for are listed below.

- □□□□□□□□ Lead Content of Ammunition
- □□□□□□□□ Ecolabels
- □□□□□□□□ Lead Renovation, Repair and Painting rule—Lead test Kit
- □□□□□□□□ Lead Renovation, repair and Painting- Workplace Standards

Please let me know if you have any questions. Thank you in advance!

Holly
