**Subject**: Weekly General Tuesday ECRAD Management Meeting
**Attachments**: RE production Tranches working.docx

Colleagues, attached are my latest musings on the RE order – collecting and slowly organizing input from branches about order, constraints, challenges, opportunities, etc.
Please review this + your chemical status and plans before the meeting at 11.

Also here is a link to the latest working schedule spreadsheet, updated to reflect the latest delays in test orders. Also added a new tab for hypothetical representation of how each branch set of REs might be spread within a tranche (probably more detail than is realistic for now, but captured concept that branches would be challenged to 'finish' many REs at the same time.

Andrew J. R. Gillespie, Ph. D.
Division Director (Acting), US EPA/OCSPP/OPPT/ECRAD
