You're welcome. =)

Best,
Catherine

Internal, deliberative

Here are a few points from the RD side, if needed.

- Clarke is testing unfluorinated containers as potential alternatives to current fluorinated HDPE packaging for at least five pesticide products, including the distributor product, Anvil 10+10.
- Clarke will submit data to confirm absence of PFAS in the unfilled, unfluorinated containers, and data to demonstrate storage stability/corrosion characteristics under worst case conditions for their products.
- The OPP Registration Division (RD) will expedite review of these data once received.

Best,
Catherine
