Adrienne-

Sounds good. I will follow-up by forward the meeting summary email to Laura and cc you. Is there any chance state or Federal Brownfields $ could be put to use here? Overall, it definitely seems like the state should be able to handle this, but...

Thanks!

Jeff Scott
Director, Land, Chemicals, and Redevelopment Division

Thanks, Jeff, I will forward you the notes Bidtah shared from the 6/16 meeting. I am happy to attend this meeting, I think it is important for the Water Division and possibly ECAD (metal plating facility compliance) be involved as there seem to be many concerns related to water quality/access.

Thanks,
Adrienne

Good Morning Laura –

I have been chatting about your questions with my teammate, Vanessa Galaviz. We think it would be helpful to talk through the best approach.

Do you have 15 minutes over the next several days or next week to schedule a quick call?

Thanks-
Bidtah

EXTERNAL:

Dear Bidtah,
Earlier this year, Jared sent a letter to us and others suggesting he was convening a cross-agency discussion related to this site. I haven't seen that scheduled, but it would be great to reference in a reply to Bradley. Is that advisable, and would you like to do so, or shall I?

Thank you,

LE

Hello Laura, Martha, Jeff, Morgan, Bidtah, and Sarah,

The tribe and the rest of the community really need USEPA and other agencies to step up and immediately take action to protect residents living near the old dumps from further harm. The day after the meeting a Cahto Tribe member who lived on the rancheria passed away from cancer, just like most of her family who have also died from cancer. This situation cannot continue.

More studies are fine, putting a cap on one dump is fine and good (how about the other, worse one - the toxic burn dump?)....but studies and caps will not stop what is clearly an ugly health situation that is literally taking an enormous human toll. This is a heartbreaking, outrageous situation and decades of government inaction are to blame.

EPA must act without further delays to help those residents living near the dumps who want to move to do so. And of course we support the Cahto Tribe's efforts for new land that is not contaminated.

Bradley

> Regretfully, EPA does not have staff available to attend the meeting tomorrow in Laytonville. I'm glad to hear that CalRecycle and the Regional Water Board do plan to be in attendance. We are interested in this issue as the conversation evolves, so please do keep me informed about future discussions in which we might be able to engage.

Subject: Concerned Residents of Laytonville invites you to important community meeting June 16th 6pm

Hello,

I am writing at the request of Concerned Residents of Laytonville to ask you to attend, and bring the appropriate staff, to an important community meeting Thursday, June 16th at 6 pm. The meeting is to update the community, elected officials and government agency leaders and staff about the serious and ongoing health crisis impacting residents that many believe is the direct result of exposure to contamination from the old landfills.

Residents will share their stories, concerns and requests, and we look forward to a constructive discussion about how to get people out of harm's way.

Please let us know if you are able to attend, thank you.

The invitation flyer is attached.

Peggy Hoaglin, Concerned Residents of Laytonville

Bradley Angel, Greenaction for Health and Environmental Justice
