Subject: Release for images in SETAC document
Attachments: Image 7-4 for release - JWisk-BASF.docx

Joe,
Hello, I hope this note finds you well.

It has been a while, but Dave and I are trying to get the SETAC document to print. We have received and have nearly completed incorporating all external comments on the document, and soon it will go back to SETAC and the publishers to being copy editing.

One of the things we need to do, is to acquire releases for the images that will be printed in the book. We don't have too many, and there is one credited to BASF, so I though you may be the source. If you aren't, do you happen to know who is? (I have attached a file with the subject image for your reference).

If you are the source, and you are ok with allowing SETAC to use this image in the book, we will need you to send a note to this end. Below is text that should satisfy Wiley and SETAC for this purpose (you will need to specify how you want the credit to be titled … for example Mace will specify that his photos are credited to "Mace Vaughan, *Xerces Society for Invertebrate Conservation*").

Please send this to: Larry, Jenn and Mimi, cc Dave and me

Thanks Joe, call me if you have any questions, talk w. you soon,
tm
