Subject: FW: Leviathan Mine - Aspen Seep and CUD Provisional Flow Data - September & October

Scott,

I inadvertently omitted the LRWQCB in my distribution of the below email transmitting

data to the U.S. EPA – please see below. Attached is the provisional flow data from the weirs located at the Aspen Seep (a.k.a. – overburden seep or OS) and CUD. The attached data file covers the time period from 1/1/17 through 10/24/17.

Should you have any questions or comments please contact Tony Brown at (657) 529-4537 or anthony.brown@bp.com.

Thanks,

Marc

Subject: Leviathan Mine - Aspen Seep and CUD Provisional Flow Data - September & October

Julie,

As requested in the U.S. EPA's April 25, 2017 email, Atlantic Richfield is providing provisional flow data from the weirs located at the Aspen Seep (a.k.a. – overburden seep or OS) and CUD. The attached data file covers the time period from 1/1/17 through 10/24/17. Atlantic Richfield has performed its last weir maintenance field visit for 2017, therefore this will be the last data transmittal of the year. Unless the 2017-2018 winter and spring are unusually different from previous years such that ongoing evaluation of CUD and OS flow data would be warranted, Atlantic Richfield will not plan to provide the U.S. EPA provisional flow data for the CUD and OS in 2018.

Please note that all flow data transmitted to the U.S. EPA this way are considered provisional and subject to further verification and possible revision. Data will be considered final when provided as part of the project database.

Should you have any questions or comments please contact Tony Brown at (657) 529-4537 or anthony.brown@bp.com.

Thanks,

Marc
