Subject: FW: Yerington Mine Site - Letter re Domestic Well Monitoring and Bottled Water Programs

Jim – Thank you for your call today about ARC's September 1, 2016 letter request. As I pointed out, ARC had previously informed EPA that changes to the Domestic Well Monitoring Program and Bottled Water Program would be coming as properties were connected to the City of Yerington municipal water system and also to account for connections to the YPT water treatment system. See attached excerpt (page 74) from the 2015 Annual Domestic Well Monitoring Report submitted to EPA on February 19, 2016. ARC's monthly progress reports began including similar language earlier this year. The June 6, 2016 Monthly Report (for May 2016) stated that "the number of domestic wells requiring monitoring will decrease as properties continue to be connected to the Yerington municipal system, and domestic wells are taken out of service," and that "ARC will be requesting approval from EPA to curtail the Bottled Water Program as properties that are currently receiving bottled water continue to be connected to the Yerington municipal system." Similar language appeared in the Monthly Reports submitted on July 6, August 9, September 9, and October 10. Let me know if you have any questions about the attached documents.

Subject: Yerington Mine Site - Letter re Domestic Well Monitoring and Bottled Water Programs

Dave – I'm forwarding the attached letter on Jack Oman's behalf. It summarizes completion of the Yerington City water system extensions to properties north of the mine site, and it requests confirmation from EPA that domestic well monitoring and bottled water deliveries can be discontinued for these properties and also for properties receiving treated water from the YPT system. Please contact Jack with any related questions.
