Subject: FYI - resharing documents relevant to future baseline WQS brainstorming
Attachments: Baseline WQS - Harvard Law Review article; FW: [EXTERNAL] New Publication -- Not the Latest Science: National Recommended Water Quality Criteria for Aquatic Life Under the Clean Water Act

Resending the attached so you have it accessible

1 – Email from Andy circulating the article by Jim Grijalva asserting that EPA has a moral and legal responsibility to promulgate water quality standards for all tribes that don't already have them.
2 – Fred and James, not sure you received this initially but Shari shared the second attachment back in September. It speaks to our 304(a) criteria and offers suggestions about better employing the use of narratives. Could be useful considerations for baseline brainstorming if there's any future movement on this rule.

Thanks,
Danielle
