Subject: Test America performance at Yerington
TAI-BP LAMP_Corrective Action Letter Final.pdf

;
Yerington Team,
I realize that you are all aware of the turnaround issues we have been experiencing with Test America for samples collected at the Yerington site. As I have explained, ARC takes this very seriously and is continuing to work this problem at a corporate level.
My understanding is that while this situation has created delays in delivery of validated data, it has not compromised the quality of the final results.
I wanted to pass along a recent transmittal from Test America that describes the difficulties they have experienced and the mitigation measures currently being implemented by Test America.
Please let me know if anyone would like to discuss further.
Thanks,
-jack
