Hi Michelle,

I somehow missed the original request, but the E-Enterprise for the Environment program is briefing the new administration and they are highlighting E-Enterprise regional activities.

I am wondering if you could take a look and either provide updates or if it would be good to send this out to the ET and ask for any additions/changes to our slide (#13)? In addition, it might be interesting/good for the ET to see the topics across the agency. There is strong cross-over between ELMS and E-Enterprise as well.

Updates are due today unfortunately.

Hello, hope you are all well.

I am checking in to see if each of you has found some time to look over the slide for your region?

I am not seeing changes to the slides in the file nor have I received any requests for additional review time.

If these slides accurately reflect your respective regional efforts, I will go ahead and finalize them as is (deleting strikeouts) for OEE to use briefing new incoming Biden team members and for your use briefing your senior leaders.

Please let me know one way or another by COB tomorrow.

Thanks very much, Lisa

Subject: EERC: project updates RSVP by 1/19/2021 (COB)

Hello, EERCs,
I am pleased that many of you were able to call in yesterday to the EE internal-EPA call and share your input on EE work in general. Thanks as always for your innovative and thoughtful participation in this collaborative effort.

Please by Jan 19, 2021 (COB), review the one slide for your Region and modify/add information regarding projects you wish to highlight (please also make sure that EELC and EERC info is correct).
1) Use the SP link provided above so all changes are incorporated in one master file.
2) Refer to slide 2 for the current list of active EE projects.
3) You can also choose to highlight efforts from our EERC 2020 engagement activities (such as ELMS-related or NEPPS-related work – go the MS teams page: look for the (09242020) EERC FY2020 report card (in the files tab) or in the EERC 2020 activities chart).

Background: As we prepare for the January changing of the guards, I updated the EE project slide deck (initially developed in 2018). I've deleted on each regional slide (using strikethrough) projects not currently active in the EE portfolio. This does not "erase" or minimize past work (completed projects –) which can be found on the EE .net site. You may want to include these if your region is actively working with states or tribes on them (e.g., ECHO, be well informed).

Please let me know if you have any questions or if you cannot make the response deadline I have requested.
Thank you,

Lisa
(Please call my work cell directly: 202-819-5118.)
