Brinda,

I have a meeting now but hope to wrap it up by 10 or a little after. Do you want me to call you or wait for your call? I am at 703-308-4043.

Thanks

Chris

Hi Chris:

Sure thing any time after ten am should work.
We did not specifically resolve the penetrance issue you mention. Not sure which predatory mosquito tox test you are referring to but if it is the toxorhynchytes feeding assay I believe Oxitec submitted the study to us. I can check into that and let you know.

Thanks
Brinda

Subject: Time to chat today?

Hi Brinda,

I had a couple questions about the Oxitec submission and was wondering if you had time to chat today. I'm specifically wondering about the assessment of penetrance in that Oxitec states it is less than 100% but I do not recall discussing the implications of this in any detail. Also, was there an appendix which describes the protocol used or the study results when dealing with the predatory mosquito tox test?

Thanks

Chris
