**Subject**: RE: BCP Ingredients Inspection

Erin,

Thanks again for keeping the lines of communication open. I just responded to Lorenzo's email and confirmed the continued uncertainty of timing around the draft PHA documents that are still in the review process and are not yet available. As you are aware, it is necessary to revise these documents periodically and BCP hopes to provide a set as soon as possible, but they documents have to go through a committee and we don't have a set timeline we can offer at this time for supplementing.

I also want to note, as we did in the original submission that there are some documents requested that the facility is not required by law to have, such as the PSM/RMP Manual and Hazard Assessment for the entire site, but when the submission is viewed as a whole, we have provide the PHAs for covered process and other documents that are responsive to those requests.

BCP is running to ground any additional clarifications to the request that were included in Lorenzo's email and will provide a response as soon as possible.

Thank you,
Kristen

**Subject:** RE: BCP Ingredients Inspection

Hi Erin,

Thanks for following up. We are checking in with BCP Ingredients and will hopefully have a better idea of the timeline for amending the submission later today.

Best regards,
Kristen

**External Email – Use Caution**

Hi Brittany and Kristen,

I understand there are some BCP Ingredients documents on which our inspectors are waiting. Can you please let me know when you expect to transmit those?

Thanks,
Erin

**Subject:** BCP Ingredients Inspection

Erin,

I hope all is well. As you may know, Stinson represents BCP Ingredients. I understand from the site team that EPA is on-site conducting an RMP inspection. Dave Hensley told them you are assigned to the case so I wanted to open the lines of communication, as well. We don't need anything and my understanding is that the technical teams have things under control. However, if you need anything, please feel free to reach out. Thank you!

Brittany
