Subject: Watergen call today - follow-up

Hi folks. I'm requesting you to provide staff members to support this effort to examine techniques to disinfect water generation systems.

Jay, thank you for a good explanation of the science involved. I was coming into the call a little bit cold, so thank you.

Elise asked us to form a workgroup of sorts, to put in place a series of CRADAs with three or more cooperators, including Watergen, who have devices that disinfect potable water systems. I'm thinking that the CRADA opportunity needs to be advertised – posted – to get other companies to participate.

Please identify some staff members to assist the Tech Transfer Group (Sarah Bauer and company, included here) in putting these agreements together.

I did not cc all of the invitees to the call, but I noted some of them are staffers. I'm not sure how many were on the call today (I couldn't hear everyone), so I'm aiming this request at the managers who were present.

Please feel free to contact me if you have any questions about CRADAs or how to proceed. Please use my iPhone number on Mondays and Fridays and my office number Tuesdays, Wednesdays and Thursdays.

Thank you! And have a nice weekend.

"Everything should be made as simple as possible,

but not simpler." - Albert Einstein
