Subject: RE: Virtual briefing on Ley Creek OU-2 PRP information

Hello again, Margo and Jim: Just checking to see if you've been able to determine if the OU-2 Expanded Area briefing by Ramboll/O'Brien & Gere could work for you next week, either June 3rd or June 4th. If so, please let me know what times would work for you. We'd need an hour and a half for this virtual presentation/conf. call. Thanks. --Carl

Hi Margo and Jim:

It looks like the best alternate date and time for the virtual briefing on our PRP information will be Wednesday, June 17th, from 1pm-3pm EDT. Again, this briefing will be led by RACER's expert consultant for the Ley Creek contribution/cost recovery case, TIG Environmental. Can you please confirm that that date and time will work for the R2 case team?

In the meantime, could Brendan and I schedule a separate briefing for you on the OU-2 area and the nature, location, depth, etc. of the contamination we've found there? RACER's consultant for the OU-2 RD/RA, Ramboll (formerly O'Brien & Gere) has prepared a very helpful virtual presentation that among other things depicts the 1000+ samples results in a three-dimensional visualization. We believe that the information presented by Ramboll will readily help the R2 case team get up to speed with our current understanding of the OU-2 contamination. Victoria and Joel likely have a good understanding of this so far, but would be welcome to join. We'd need about an hour and a half for the call with Ramboll. Several of our RACER colleagues would likely join this call, too.

If the Ramboll briefing would be of interest to you, could we schedule it for either Wednesday, June 3rd or Thursday, June 4th?

Thank you for your help in scheduling these briefings. We look forward to providing you with what we believe will be very useful information.

--Carl

Hi Carl,

A few of us cannot do June 5. Could you propose additional dates/times that would work for RACER and TIG Environmental in the coming month? The week of June 15 or June 22 would be preferable for me.

Thanks,
Margo

Hi Jim and Margo: Our consultant TIG Environmental has asked if we could schedule the PRP briefing for early afternoon (say 1pm EDT) on Friday, June 5th. Would that date and time work for you and the rest of the R2 Team? Thanks. --Carl
