Actually, Tom's calendar looks even more cramped for next week. ☺ I'll send around a calendar item with a call in for this Wednesday from 2-3pm imminently. Thanks, Erica!

Hi Karina,

Yes, I'm available. Do you want to wait till next week when things are less crazy? This is important, but not urgent for this week.

Let me know what you want to do.

Best,

Erica

Hi Erica -

Thanks for the feedback!

Just a quick clarification: the 'original outputs' column was pulled directly from the existing work plan. The 'revised outputs' column was our attempt to streamline it and simplify it without the excessive listings of meetings, etc, per Sam's request. If we overshot it, we can certainly add some of the detail back in that was in the work plan already.

A call would be great. We can talk about it in more detail. Next week is a little tough - the Ballona DEIR/EIS is being released on Monday (whoho!), and we have our annual fundraiser on Thursday - not to mention the usual cramped schedule of meetings, etc. But are you both possibly available in the afternoon sometime on Wed, 27th anytime between 1:30-4pm?

If not, I'll check in with Tom and can send around a few other times...

Thanks!

Karina Johnston

comments.

I will provide our overall sentiment now so there are no surprises. The table is not where we want to be, but it's fine for now. Let's table this discussion until you start planning for the 2019 workplan*. On this note, please let us know when you will began the planning process so that we can get on the same page early on. I think we should work on a couple of examples together.

Specific comments

Outputs: We were a little confused by the "original outputs" and "revised outputs." The content of most of the cells should be combined (actions and deliverables).

Outcomes/environmental results:

-each individual task does not necessarily result in an environmental outcome; in fact there may be only a handful of environmental results for your entire work plan (e.g. kelp reforestation, abalone, dune and beach restoration, and prop 84 projects (water quality improvement).

-The environmental results should be measurable.

-The five-year and twenty-year outcomes are often the same in your table which doesn't necessarily make sense.

*One place where I would like to see updates in the short term is the BRP revision. I would like to see a few more outputs captured for the BRP revision (red text below).

68	Multidisciplinary	***NEW*: Conduct BRP Revision	Review existing 2013 BRP; Hold public workshops for the GB, WAC, and conduct broader public outreach to solicit input for the 2019 BRP revision; what else?	Timeline, outline, workshop notes, draft BRP, final BRP Update by 2019	Reported progress in BRP implementation, improved environmental conditions measured by various indicators and shown in State	Reported progress in BRP implementation, continued improved environmental conditions measured by various indicators and shown in State of the Bay report.

of the Bay report.

Complete BRP
Revision process
by 2019

Let me know if you want to set up a call to discuss.

Thanks for your patience.

Have a good weekend.

Best,

Erica

Subject: FY18 Work Plan Edits

Erica,

Attached you find our responses clarifying the deliverables as well as the 5 to 20 year outcomes for the projects/tasks/actions identified in our FY18 work plan.

Looking forward to speaking with you about this once you've had a chance to review it.

Thanks,

Tom Ford

Executive Director
