Hi Eugenia,

I updated the QA term and condition. Do I need to resend the FR to you for signature?

Thanks,

Erica

Hi Erica

Please change the QA T&C to reflect current status:

This grant includes the performance of environmental measurements. **A Quality Assurance Plan was approved by EPA on 8/6/2016 and has a 5-year life.**.If new measurement activities are planned that are not covered by the existing document, the existing QA Plan must be amended or modified to reflect these new measurements. The recipient should consult with the Region 9 Quality Assurance Office to determine what type of QA documentation would be most appropriate and what QA guidance should be followed. The QA Plan must be approved by the EPA Project Officer, the Region 9 Quality Assurance Manager, and the recipient's Quality Assurance Officer before new measurement activities are undertaken. Emergency measurements may be taken without a QA Plan being prepared if the Region 9 Quality Assurance Manager agrees that the nature of the data collection activity required due to the emergency warrants an exemption. Contact the QA Office at 415-972-3411.

Thanks,

Eugenia
