Chris,
Attached is the final lab data for Area 01 and M-Comp samples.

We will generate approximately 652+/- cubic yards excavating Area 01.

We will generate approximately 370+/- cubic yards excavating Mounds 1,2,3 and 4.

We need to come up with a description for the debris. Please add to description.
Debris Description: Military surplus equipment (parachutes, electronic, paper, wood, metal, visqueen, wire batteries, battery chips) the debris will be 3' feet.

This material could be our soil and debris waste for macroencapsulation?
