Shaun and Tim, please find attached a copy of the EPA letter to B.C. ministries that was transmitted this morning. We appreciate the efforts to identify a third expert reviewer from Montana to evaluate Teck Resources' proposed Saturated Rock Fill technology. We hope that this independent review from U.S. experts will give us more comfort that this technology will be effective at finally reversing the increasing selenium trends in Lake Koocanusa and the Kootenai River. As always, please feel free to reach out with any questions or concerns.
