The dimensions of the slough east of the facility made for an awkward final image size, but the result is large enough to zoom in and see additional detail. Please let me know if we can provide any additional imaging around the site.

Thank you,

Lloyd Long

All,

Please see attached maps and georeferenced aerial imagery for the Red River Supply facility. I have collected imagery for the drainage channel east of the facility that is still being processed. The area was large enough that several images need to be placed together in series. They will be distributed as soon as they are complete.

Thank you,

Lloyd Long
