Dorothy,
The bar data is from Table 3 – NWS Daily Weather Results for January 2018, page 14 of the EER.

Dorothy,
This is a combination of local PM10 data from the site, and national weather service data. The wind speed data was downloaded as minute data from the national weather service. The peak and sustained wind speed bars are from the national weather service data noted in Table 2 – NWS Hourly Data. It is the same for the other EER demonstrations.

Dan, What is the location for the National Weather Service wind data in Figure 1 on page 12 of Jan 15, 2018, document? Albuquerque airport? Thanks

Dorothy Crawford
