Dear Emily Schmid,

Following discussions between Bayer CropScience LP (Bayer) and EPA regarding Bayer's submissions on September 7, 2022, October 18, 2022, December 13, 2022 and January 6, 2023, Bayer is herein submitting an updated version of the XtendiMax With VaporGrip Technology master label to support Bayer's proposal to reduce the cut-off of date for in-crop applications of XtendiMax for soybean and cotton respectively from June 30th and July 30th to June 12th for Illinois (IL), Indiana (IN) and Nebraska (NE), from June 20th and July 30th to June 12th in Iowa (IA) and from June 30th and July 30th to June 20th in South Dakota (SD).

The State of Arkansas (AR) has been removed from this proposal as the AR State Plant Board indicated they did not support additional restrictions for the use of XtendiMax with VaporGrip Technology.

This application is being submitted electronically and contains the following:

- This cover letter
- Application for Pesticide Registration (EPA Form 8570-1)
- Amended Master Label with changes highlighted
- Amended Master Label (clean copy)

Please contact me or George Sabbagh in our Washington D.C. office at (913) 231-6291 or george.sabbagh@bayer.com should you have any questions.

Sincerely,

Bayer U.S. – Crop Science

Arthur Toscano
