Subject: RE: Pechiney - Phase I Completion Report

Hi Chand,

Sorry for the delayed response, but I was out last week visiting with family. We'll upload the report to Envirostor as recommended below.

With respect to the Phase III/IV/V Area report, we would prefer keeping the Phase III and IV areas together in one report, but can split out the Phase V area as a separate report. Ok?

Thank you, Linda

Linda Conlan, PG

Thanks for the Report Linda. I have created and scheduled the activities for remedial action completion reports for all phases in Envirostor. Please directly upload this report and reports for other phases in Envirostor. Please name this report "Phase I Remedial Action Completion Report" and same for the other reports with their phase numbers. Will there be one report for Phase III/IV/V Area? If possible make separate reports for these phases too.
Thanks

Subject: Pechiney - Phase I Completion Report

All,

Please find attached the completion report for the Phase I Area of the site (north end of the property). As a means of expediting the review process for this project, we have separated the data reporting into three areas, with the first of the completion reports attached. Completion reports for the Phase II Area and the Phase III/IV/V Area will be submitted after structure and soil removals in these areas are completed. The last completion report will also include site-wide information, such as the perimeter air monitoring results, a final record drawing, and site grading information, etc.

Because of file size, the attached report includes the report text, tables and figures only. A complete version of this report, with the appendices will follow next week on CD with a printed copy of the larger figures.

Thank you, Linda
