Clean Harbors Colfax is in the processing of submitting its RCRA application and trying to work out acceptable forms of its operation. Clean Harbors wants to continue to ob/od of cylinders, rocket motors, warheads and large fireworks.

Please verify if General Dynamics takes in the above mentioned items and handles them without using OB/OD. I would like to send a copy of your reply to EPA and LDEQ with your permission.

If Clean Harbors can not handle these items without using OB/OD then maybe these items could be sent to a General Dynamics facility that does not use OB/OD.
