Subject: RE: [External] Chemours - Stack Testing Schedule Week of Jan 22

Christel,
During the December 18th meeting with Chemours, DAQ discussed obtaining samples of the GenX air emissions tests. Initially we discussed dual sampling trains and then discussed split samples after extraction of the test media by Test America. The DAQ is reiterating our request for split samples after extraction.

Starting with testing during the week on 1/22/18 on the PPA & Division stacks, please inform your contractor to prepare split samples after extraction of each run at each stack. Please request that Test America converse with the EPA staff listed below to provide any testing or analytical data necessary to assist with the analysis of the samples. Transfer of the samples shall be directly to the EPA lab following instruction provided by EPA.

EPA Staff:

Michael and Greg –

I have confirmed with Weston Solutions that they will be on site next week (week of Jan 22) to perform the official stack testing of the Division and PPA stacks for HFPO Dimer Acid Fluoride. The schedule is as follows:

Mon, Jan 22 – arrive at the site and set up on the Division stack. They may try to get in one 3-hr run Monday afternoon.
Tues, Jan 23 – complete 2, 3-hr runs.
Wed, Jan 24 – complete 3rd, 3-hr run, if not completed on Tues. Mobilize to PPA. If able to get in 1, 3-hr run, then will do this on Wed.
Thurs, Jan 25 – complete either 2 or 3, 3-hr runs.
Fri, Jan 26 - complete remaining runs, if any.

I will be creating a sheet to document what operations are running during each test.

Please let me know what questions you may have.

Thanks –
Christel
