What tag should these studies have? I can remove the LHP tag in the inventory – either delete the row or retag to another tag.

Cheng, 2016, 4442497
Morgan, 2017, 4532294
Aydemir, 2017, 4453216
Dingler, 2020, 7311207
Sholapuri, 2020, 7311681

I don't know where they came from; I assume from someone flagging them for review within LHP cancer animal and Amanda automatically adding them to that project. I am done with inflammation, RT cancer, LHP cancer, LHP MOA (needs formatting), URT MOA (needs formatting). I am working on RT path now, and then will switch to neuro and repro. So, any of those that I am done can be used to clean up the tagging. Thanks!

Andrew,

You asked to Exclude 5 studies from LHP Cancer Animal. I checked all of them and actually none of them exist in the Distiller project for LHP Cancer Animal. Can you check if they are from a different project? I responded to your comments in the word file.

Sury
