Subject: docs to send mezencev (for discussion today)
Attachments: Chapter 5 Formaldehyde Prepub.doc; Summary Formaldehyde Prepub.doc; Chapter 8 Tetrachloroethylene FINAL.doc; Chapter 11 Tetrachloroethylene FINAL.doc

In our management meeting post Mezencev's reference checking it was suggested that we send him a review we have received from the SAB. The thought was to provide him with adequate basis for understanding the kind of feedback we get from our reviewers and the associated difficulties. I was thinking of one or both of the above chemicals but only provide a chapter or two, and in particular point him to the leukemia sections of these documents. These were NRC, not SAB reviews. We will discuss at our meeting today.
