Attachments: FormaldehydeTRdraft070113forREVIEW_AG and MSH comments_071813.docx

Hi John,
Attached are both Audrey and my (minor) comments for the Pulm. Function section. Audrey did a very thorough and insightful review of the section and I concur with all of her comments; my own suggestions are minor, and focus mainly on the MOA and relating to the basic science.

Have a great weekend!

Mehdi

Subject: summary of my comments on the pulmonary function section of formaldehyde

Hi John,

Attached please find a summary of my major and minor comments for the group discussion on Monday. As you know, I will probably not be able to attend so I thought I would send this brief summary along to facilitate a discussion with the authors.

Mehdi, please feel free to present a summary of your comments along with mine if you feel comfortable doing so. Otherwise, the summary I have provided here can be used by you or John W. or John S. during the discussion on Monday. Hope this is helpful.

Thanks.
Audrey
