How agents work – whats in it.
B&R rept – B/S. They have int. in Champion paper.
They admit permeability. EPA stopped Tex City from putting in land fill – w/in 1 ft of mean high tide. McGinnes different?

1973 – County tried case for him re Place Industries – J. ruled 20' embankment not sufficient ht., Place liners on it.

Existing dikes 12'
new – base 30', 2:1 slop

Better to dump on marsh – get washed away quicker.
Will get emulsed out sooner or later any way.

Do not <u>propose to line pits.</u>

New pits w/b in front of W Bay cut – in path of hurricane

Nobody monitoring — Johnson comes down sometimes.

He could syphon it off tonight and nobody would know.
No watchmen, etc.

Metals — not worried about — they propose to dry stuff in Hou. — may be different.

Toxicity — reprod. of org. in marsh — indigenous species.
(Carl Oppenheimer, P+ Aramus, doing categorization of species in area)
What species relevant.

Engineering —
hurricane protection
leaching,
seepage

Land Utilization — marsh 15 x productive — we have no express land use regulation auth.

~~Water should be acceptable to~~
Tex Water Code.

FDA criteria apply? –
We may not have same criteria as FDA.

We'll be sampling

Hydrolyzed beans – non hydrolyzed

Acute tox.
