She's interested in both EPA's letter in response to Coakley Landfill Group on Fish Tissue Workplan (see attached PDF). As you can see by her questions immediately below, she's also interested in how this relates to our work on PFAS and the upcoming workshops.
> > >
> > > I propose that we and the team draft answers to her questions and try to explain this letter in lay-person's terms (insofar as the lawyers concur that we can do that!). I am also comfortable having the team (Skip and Jim) speak to her on background to make sure she understands the Berry Brook fish tissue issue. Since she is very interested in the 6/25-26 Summit I think it makes sense for you to do a subsequent interview with her on the big picture topic(s). Let me know what approach makes the most sense to you and then I'll let Molly and John K know and seek their buy in.

Thanks in advance!
Dave

Does the EPA have a statement about the work that is being done at Berry's Brook and why it is important to ensure the health of fish and humans?

Does this response contain any new requirements in testing and if so, what?

When EPA officials were here last week they said EPAs are a top priority. Does this response reflect that sentiment?

Will this topic be brought up during the public information sessions in Exeter June 25 and 26?

Thanks so much, Dave.

Kim

Great. I am more than happy to wait if we can make sure our readers get a clear understanding of what is happening. There are a number of rumors out there.

Hi Richard,

I got your letter regarding the sampling at Berry's Brook and am having a hard time putting your response into terms our readers can easily understand.

Can you tell me how you would explain this to your grandmother?

You can email me back or give me a call at 361-7802.

Thanks!

Kim
