Re: Chemours Chambers Works
Petition for Public Participation

Dear Ms. Seppi,

This letter follows up the Township's petition for public participation and the meeting held with DEP and EPA representatives on May 12, 2017. We have received no further updates with regard to the remediation work being done at the site since Mr. Marbury's letter of July 24, 2017.

In order for the Township to stay informed of ongoing remediation activity at and around the Chambers Works site the Township requests that the EPA accept this letter as our FOIA request for EPA to set aside all documents, emails, reports and correspondence EPA receives from and sends to Chemours, DEP and others with regard to the site for the preceding month for review by our representatives on the third Wednesday of each month until further notice by us. This request shall be for all site remediation program documents held by EPA in New York City. If this is unacceptable then we will file FOIA requests for these documents on a monthly basis using the FOIA internet portal until further notice.

Also, I would like a copy of the public participation plan DuPont and/or Chemours has prepared for this site in draft or final as the case may be, including correspondence related thereto.

Please let me know how EPA will provide us with access to these documents. Thank you.

Sincerely,

Karla Smith

Karla Smith
