---

David et al,

Please find attached the consolidated agency comments to your submittal of the Baseline Ecological Risk Assessment Report as required under Section 5.3.1.5 of the RIFS Statement of Work . The submittal was based on findings documented in the Ph1A and Ph1A-B data-reports of the sitewide remedial investigations conducted to obtain the information required to produce this comprehensive document.

The U.S. Fish and Wildlife Service and the State of Utah have contributed to and reviewed these comments. Thank you for the thorough technical discussions between our staffs in bringing this draft report forward. I believe this review-response should enable ERM to produce the final submittal that will fulfill compliance with this aspect of the RIFS-AOC.

Please reach out to me and/or Brian Sanchez if you have any questions.

Sincerely, Ken Wangerud

Subject: RE: Final US Mag OU-1 BERA Report

Hi Ken,

Please find attached the Final US Mag OU-1 Baseline Ecological Risk Assessment report that addresses all of EPA's 16 December, 2021 comments and is consistent with the subsequent

discussions between the EPA/ERM technical teams. I have included a redline strikeout version to show the changes from the draft, and a clean version of the entire report. The appendices as the file sizes are too large to e-mail, but let me know if you would like to see them now and we can upload them to the SharePoint site.

Please to let me know if you have any questions regarding this submittal.
