Subject: MassDEP Marine Dissolved Oxygen (DO) Technical Advisory Committee - Response to comments - Phase II

Jim,

Thank you for your comments on the draft report reviewing saltwater dissolved oxygen (DO) criteria in Mount Hope Bay and the Taunton River, Massachusetts. Because of the number and complexity of comments we received, MassDEP has engaged Normandeau and Tetra Tech in a Phase II effort to address your comments and look more broadly at Marine DO criteria.

To this end we would like to invite you to two follow-up Technical Advisory Committee meetings to address the comments and finalize the DO criteria report. **April 3rd or April 5th** are possible options for the first meeting and **May 1st, May 2nd, or May 3rd** are possible options for the second meeting. Before we finalize the dates for both meetings, please let us know if your schedule would prohibit you from participating on any of these potential dates.

Once I have your input I will follow-up to communicate the dates and times for the meetings.

Thanks,

Richard O. Carey, Ph.D.
