Subject: In-process material sampling

Bill Potts of MDEQ called today. He has completed his review of CFAC's TCLP analysis of 17 in-process materials. Bill is satisfied that none of the materials fail TCLP and are therefore non-hazardous. He was appreciative of CFAC's cooperation in collecting this data. He considers this issue closed for now. I told him his previous letter was all the correspondence we needed and he doesn't need to respond to our submittal of the data.

Re: Results of in-process materials sampling

Dear Mr. Potts:

Enclosed are the analytical results from Northern Analytical for the 9/25/01 sampling event at Columbia Falls Aluminum Company.

The analytical results indicate that none of the sampled materials are hazardous waste. Please call if you have any questions about the enclosed.

Sincerely,

Steve Wright, PE
Environmental & Laboratory Manager

REPORT TO: ATTN: STEVE WRIGHT
COLUMBIA FALLS ALUMINUM COMPANY
2000 ALUMINUM DRIVE
COLUMBIA FALLS MT 59912

DATE: November 8, 2001
JOB NUMBER: 86-944
SHEET: 1 of 30
INVOICE NO.: 90297

REPORT OF: Solid Waste Analysis – CFAC - In Process Materials

CASE NARRATIVE:
On September 28, 2001, these solid waste samples (laboratory numbers 2001090297-1 through 8) were received in our laboratory for analysis. Tests were conducted in accordance with SW-846 *"Test Methods for Evaluating Solid Waste"*, 3rd Edition, updates I, II, IIA, IIB, III.

The condition of the samples upon receipt at the laboratory is noted on the attached sample receipt checklist. Chain of custody documentation is enclosed.

The results of the analysis are shown on the following pages. A matrix spike for metals was performed for each sample in order to evaluate the effect of the matrix on the metals concentrations. The matrix spike recoveries indicate matrix effects are minimal. A matrix spike was performed for volatile organics on one sample, the cryolite bath. The matrix spike recoveries indicate the matrix effects were found to be negligible. A matrix spike was performed on the coal tar pitch sample for semivolatiles. This sample was predicted to have the most profound matrix effect on the sample analysis as it was most organic in nature. The matrix spike recoveries indicate matrix effects were minimal. Concentrations for the TCLP semivolatiles for the coal tar pitch sample are reported in another sample delivery group.

A < sign indicates the value reported was the practical quantitation limit for this sample using the method described. Concentrations of analyte, if present, below this were not quantifiable.

Footnotes:
(1) The waste is not considered flammable under the conditions of the test.
(2) The methyl ethyl ketone lab control sample recovery is above the stated control limit with no effect on the sample result as the analyte was not detected in the samples.
(3) The pyridine lab control sample recovery is below the stated control limit. The matrix spike recovery was acceptable. The TCLP rule places greater on the matrix spike recovery and surrogate for data validation considerations. The EPA "Technical Assistance Document for Complying with the TC Rule", Section 5-5, states that if the matrix spike and surrogate recovery are above 10% the data should not be rejected. The pyridine data is flagged UJ, estimated quantitation limit, due to the LCS failure.
UJ -The analyte was not detected, the quantitation limit is estimated.

***Revision: Sample descriptions were changed by the client. Chloroform reporting limit revised.**

Client Name: COLUMBIA FALLS ALUMINUM CO.

Project No.: CFAC

Project Name: IN PROCESS MATERIALS

Sample No.: 2001090297-18 **Description:** MATRIX SPIKE OF W. PLANT ALUMNIA TRANSFER N.

Date Received: 09/28/2001

Date Collected: 09/25/2001 **Collected by:** BRIAN HOHN **Matrix:** SOLID WASTE

Laboratory Test	Measured Value	Test Units	Test Method	Date of Analysis
TCLP METALS				
Mercury TCLP Digest Date	236	-----	7470A	10/31/2001
TCLP Digest Date	1620	-----	3010A	10/31/2001

SAMPLE RECEIPT CHECKLIST

Dear Valued Client: This checklist documents the condition of your sample(s) as it (they) arrived at our lab. Please review it and familiarize yourself with its contents. Should you have any questions or comments, please contact us. Thank you for your use of our services.

Client Name: CF AC

Project: In Process materials

Laboratory Number(s): 2001090297

Checklist Completed by: MJ 9-28-01 (Initials / Date)

Date/Time Received: 9-28-01 1010 (Date / Time)

Received by: D. Jensen

Carrier Name: UPS

Sample Type: Solid waste

	YES	NO
1. Shipping container in good condition?	✓	
2. Custody seals present on shipping container? Condition: Intact ✓ Broken ___	✓	~~✓~~ MJ
3. Chain of custody present?	✓	
4. Chain of custody signed when relinquished and received?	✓	
5. Chain of custody agrees with sample labels?	✓	
6. Custody seals on sample bottles? Condition: Intact ___ Broken ___		✓
7. Samples in proper container/bottle?*	✓	
8. Sample containers intact?*	✓	
9. Sufficient sample volume for indicated test?*		✓
10. Ice/Frozen Blue Ice present in shipping container? (circle one)	✓	
container temperature 1. 5.5 2. ___ 3. ___ * (if <0 or>10)		
11. All samples rec'd within holding time?*	✓	
12. VOA vials have zero headspace? * (if contains >5mm headspace)	NA	
13. Trip Blank received?	NA	

	YES	NO
14. pH check performed by: ___		
15. Metals bottle(s) pH <2?	NA	
16. Nutrient bottle(s) pH <2?		
17. Cyanide bottle(s) pH >12?		
18. Sulfide bottle(s) pH >9?		
19. TOC bottle(s) pH <2?		
20. Phenolics bottle(s) pH <2?		
21. Oil & grease bottle(s) pH <2? (checked by analyst)		
22. DRO/418.1 bottle(s) pH <2? (checked by analyst)		
23. Volatiles (VOA) pH <2? (VOA pH checked by analyst)		
24. Herbicides (515) pH <2? (checked by analyst)		
25. Semivolatiles (525) pH <2? (checked by analyst)		
26. Client contacted?		
27. Person contacted		
28. Date contacted		

NOTES: **Samples may be affected when not transported at the temperature recommended by the EPA for the test you've selected. Please contact the lab if you have concerns about the temperature of your samples.**

* **Critical item - if marked "NO" contact lab manager.**

COMMENTS: # 9 - may not be a minimum of 100 grams as needed for TCLP tests. - Will measure gram weight upon analysis.
